Protect yourself from the Sasser Internet Worm

The new Sasser.A Internet Worm is spreading rapidly around the world, infecting Windows PC's which do not have the latest Microsoft security patches.

Quicksilver customers should ensure they are protected by following these steps:

- 1 - Install a good firewall, such as the free version of Zone Alarm. There is a free version available for download from www.zonealarm.com
- 2 - Ensure you have the latest Windows Updates from <http://windowsupdate.microsoft.com>
- 3 - Ensure you are always running a good antivirus program. We recommend the free version of AVG available for download from www.grisoft.com.

Find more information from Microsoft about the Sasser.A worm at www.microsoft.com/security/incident/sasser.asp
